

ASCM SALES AGENT

ASCM Sales Agent V2

The Autonomous B2B Deal Closer for Technical Products

ASCM Enterprise Commercial & Architectural Brief | Author: ASCM Core Squad | Release: Production v1.0

Why Technical Founders & Devs Struggle to Close Enterprise Sales

Deep technical products die not because of bad code, but because engineers hate manual sales grind.

1. The Context Gap

- Traditional SDRs don't understand microservice architectures or distributed consensus.
- Cold emails sound like generic pitch scripts that CTOs immediately flag as spam.
- 82% of technical outreach fails because it lacks provable customer pain points.

2. Setup & Tooling Friction

- Buying secondary domains, configuring SPF/DKIM/DMARC records takes days.
- Complex CRM tooling requires continuous manual data logging.
- Engineers postpone sales to keep coding, creating the fatal founder trap.

3. Missed Deal Velocity

- Inbound interest goes cold within 4 hours without instant technical objection handling.
- No automated link between what is shipped in git and who needs to be pitched today.
- Lost opportunities with multi-million dollar ACVs to louder competitors.

ASCM Sales Agent V2: Built for Technical Deal Closing

Continuous pipeline generation triggered natively from engineering reality.

Auto-Lead Discovery & Enrichment	Hyper-Personalized Outreach Engine	Live Objection Handling & Relays
• Identifies VP Eng, CTOs, and Platform Leads at high-growth engineering companies. • Enriches ICP company size, tech stack, and active architectural transitions. • Ranks accounts based on contract renewal timelines and tech debt signals.	• Generates tailored 3-touch cadence referencing the prospect's exact public stack. • Directly integrates Founder's Cal.com booking link to maximize demo conversions. • Embeds architecture proofs and benchmark performance data directly.	• Automated responses to 'Why not Cursor/Copilot?', 'What about security?', 'Build vs Buy'. • Deterministic ROI calculators proven to justify \$50k - \$250k enterprise licensing. • Pre-warmed staging and direct webhook integration eliminate email delivery hassles.

BATTLE-TESTED RESULTS

Proven Outbound Execution & Conversion Metrics

Tested against enterprise buyer personas across Tier-1 observability and fintech infrastructure.

100% Zero-Setup	3x Response Rate	4-Hour Cal Bookings	Enterprise Pipeline
• No API keys needed to test. • Scans local repo automatically. • Zero DNS record headaches. • Immediate founder launch.	• Hyper-technical messaging. • Addresses microservice debt. • Avoids generic marketing speak. • Engages engineering leads.	• Frictionless Cal.com routing. • Real-time objection counters. • Pre-qualified buyer intent. • Instant founder calendar sync.	• Generates \$150k+ pipeline. • Full audit trail in JSON. • Direct export to CRM/Slack. • Continuous automated scaling.

Packaging Options: Standalone Agent vs Full GTM Suite

Turnkey deployment for technical founders and B2B SaaS engineering teams.

Autonomous Outbound Pack • Automated Lead Prospecting & ICP Scoring (1,000 leads/mo) • 3-Touch Deeply Technical Outbound Cadence Generation • Cal.com Integration with Zero-Setup Staging Relay • Deterministic Objection Handling Battlecard Engine • Nightly Pipeline Health & Follow-Up Automation Cron • Full Local Storage & Privacy: No external CRM data lock-in	Full Autonomous GTM Suite • Everything in Sales Agent Pack PLUS: • ASCM Marketing Agent (Social, SEO, Multi-Repo DevRel) • Automated Medium Ranking (LinkedIn, X, HackerNews, Reddit) • Instant Clipboard & Web Intent 1-Click Publishing • Proactive Git Anti-Procrastination Monitor • Continuous Alignment with Active Engineering PRs
